*Administrator Announces  
Procedure For Marketing*

## Cotton Crop Within Quota

DR. BARRY UDESS DRAINAGE DISTRICTS, BREEDING MOSQUITOES

MONTGOMERY, July 20.—Drainage of mosquito-breeding areas was urged today by Dr. J. N. Baker, State Health Officer, as the most effective means of curbing malaria, which is expected to meet more Alabama than any other disease known to medical science.

Dr. Baker, who has been busy since summer's start with his work aimed at the destruction of the breeding places of the Anopheles mosquito, which is the carrier of malaria, said that the breeding of mosquito playing a part in the spread of malaria in this State, "is the only thing that we can do to recognize and discharge their responsibility for the health of the people of this State as well as their own health and that of the members of their own family."

Dr. Baker said that malaria is "one of the most common and one of the most serious of such a type of disease."

AUBURN, Ala.—Regulations for establishing marketing quotas for cotton under the Agricultural Adjustment Act of 1938 and outlining the procedure to be followed by producers, gunners, and buyers in connection with the marketing of this year's cotton crop have been announced by A. W. Jones, administrator of the Agricultural Marketing Administration in Alabama.

Use of marketing quotas for the 1939 cotton crop was approved by the Federal Marketing Administration voting in the referendum on March 12.

The regulations to be based on the cotton acreage allotments and the normal cotton yields of individual counties will be administered by county committees as provided in the act. The normal cotton yields for each county will be calculated from the available

The malaria-transmitting mosquito are allowed to remain untrained or "wild," and they can bite humans as well as animals. Farmers who own adjoining lands should work out drainage projects with their neighbors by meeting his share of the expense in return for the benefit and contribution to the welfare of the community as a whole. Fortunately, the mosquito problem is not so common as it once was, and to make such a contribution in the spirit of good citizenship and neighborliness, business has brought material rewards in the form of improvements in the health of the people and the areas of tillable soil or pasture."

Dr. Baker called attention to the fact that the census was showing that 228 malaria deaths occurred in Alabama last year, or about one death per town, every 12,900 of population.

**ANDY HERE TODAY FOR  
DOUBLE-HEADER GAME**

Andalusian will play the Elites Red Sox on the local diamond this

The game this afternoon will be a double-header and promises to furnish good entertainment for the fans. The first game was here early in the season. Later, on July 4th, Elia defeated the home team by a score of 9-2, one of the best games seen here.

Elia played a double-header here last week, and won both games from the visitors. In the game Sunday, Elia lost to the home team by a score of 1-2.

The present season is fast drawing to a close and Elia fans are being urged to purchase the remaining scheduled games.

Elia will be exempt from the 25-cent tax on cotton marketed by the marketing of any part of their cotton.

When terms on which cotton allocations are overplayed, the producers will receive another type of tax. The tax is based on the amount of cotton produced in 1938 or held over from a prior year and is levied on the cotton to be sold without penalty.

Producers will be required to identify their cotton at the time it is marketed by showing the buyer a cotton marketing card or certificate.

The penalty on cotton marketed without the cotton card will be collected by the buyer at the

**ALABAMA DISTRICT CAMP MEETING IS ANNOUNCED**

The Alabama District Council Assemblies of God will hold their annual camp meeting at Fort Worth, Brocken, July 29-August 1.

Editor Guy Shields, Fort Worth, Texas, noted evangelist, editor, author and camp meeting speaker, will speak at 11 a.m. and 5 p.m. K. M. Gyarg, Bible teacher of Southeastern Bible Institute, will speak at 11 a.m. and 5 p.m. J. C. E. Smith, pastor of First Baptist Church, will speak at 3 p.m. Editor J. C. E. Smith, president of the Alabama District Council, and president of Southeastern Bible Institute, will preside at the

deducted by him from the price paid for the cotton. However, the property committee arranges with the county commissioners that the owner of the property will be liable for the payment of any penalty which he may incur, prior to the sale of his cotton. The property committee, by buyers must be remitted to the treasurer of the county committee in the county in which the cotton is sold. The proceeds within 30 days after the sale. These sums will be covered into the Treasury of the county.

The quota regulations require ginners to keep a record of all cotton ginned and to submit a record of the same to the county clerk in the form of a statement prescribed forms to the county committee

The meetings will be held under a large tent erected in the public square.

On July 30-31, the State Historical Ambassadors Convention will convene in the city, with the camp meeting. Grover M. Laington, the president of the C. A. A. or "Yankee" organization, will preside.

The public is cordially invited to attend these meetings.

**J. C. THAMES**

Mrs. W. M. Ringdorff and little son, Frazier, left Monday for Lafayette, where they will spend some time, guests of her parents, Mr. and Mrs. J. F. Frazier.

Mr. John M. Garrett, Jr., of New York City is spending his vacation in Elba, guest of his parents, Mr. and Mrs. J. M. Garrett.

Mrs. Annie Waters of Montgomery, Ala., spent the week-end in Elba during the week-end.

Douglas Baesters, Auburn student, spent the past week-end in Elba with his mother, Mrs. Eva

son, Ed. III, of Rocky Mount, N. C., are guests in the home of their parents, Judge and Mrs. J. A. Marley.

Mrs. J. M. Marsh is spending several days in Dothan with Mr. and Mrs. D. C. Marley.

WHAT DO YOU THINK OF  
YOUR FART?

Editor Dorian of The Globe  
news gives circulation news  
an old one, and a good one, when  
it says: "No, we didn't receive  
the following letter, but we know  
an editor who did." Please send  
me two copies of your news-  
paper containing the obituary of  
my aunt. Also publish the en-  
tire obituary of my aunt. I have  
two half calves for sale and  
our church is having an ice cream  
supper, tickets 20 cents. As my  
subscription is out, please stop  
the paper as the paper is not  
waste money on newspapers."

## AS TO PRINTING PRICES

The Herald guarantee to meet  
the price of any other paper.  
Neither do we ever "bid" for  
business. Any newspaper worthy  
of its existence gives hundreds of  
dollars in free publicity to the  
people of its town and county.  
We do not charge for advertising.  
In this time of cut-throat prices  
for advertising, we are not  
stricken as being unjust to the  
newspaper man and unworthy  
of the respect of the public.

In the course of a year your  
newspaper man has expected to  
make liberal contributions to every  
conceivable form of charity, from  
relieving the poor to relieving  
the Armenian to endorsing a  
war for superannuated soldiers.  
And the poor ginks usually re-  
spond with as much liberality as  
the rich. They are not to be  
tricked. To ask or expect your  
printers, then, to engage in a throat-  
cutting price war to a point where  
they would be unable to continue  
their work is to ask the impossible.  
And they are unable financially to  
contribute any civil service or  
other worthy strikes us, show  
rather poor business judgment.  
The Herald is not a business  
for the purpose of putting any  
competitor out of business. We  
would feel much better to have  
a competitor had secured a  
piece of business at a decent price  
than to take it at a living price,  
merely for our competitor  
to be getting it at a living price.  
—Don't ask Herald.

## OUR MULTIPLYING TAXES

With governments expanding  
their functions into almost every  
phase of human activity, the prob-  
lem of taxation grows more com-  
plex and more important. The  
taxes and heavier taxes are be-  
coming more and more important.  
We have it on all authority  
that the Federal Government is  
one-third of the American people  
are lifted. They clearly do not  
pay for the protection of the  
country, school districts, fire dis-  
tricts, etc., there are more than  
100,000 taxing units in the United  
States. Many persons live in  
jurisdictions, each with power  
to levy taxes on the same property  
or person.

## NEW HOPE SINGING

The annual Home Coming Sav-  
ed Harp singing covered at  
New Hope Sunday, July 10th. The  
money is expended. We have not  
enough good schools, hospitals,  
highways, bridges, police and fire  
protection, and the list is long  
for which tax money is spent. It  
is a pity that such things should  
be paid for out of taxes. But there  
are many things about our  
national tax situation which call  
for revision.  
One is the duplication and over-  
lapping of functions in almost every  
phase of human activity. The prob-  
lem of taxation grows more com-  
plex and more important. The  
taxes and heavier taxes are be-  
coming more and more important.  
We have it on all authority  
that the Federal Government is  
one-third of the American people  
are lifted. They clearly do not  
pay for the protection of the  
country, school districts, fire dis-  
tricts, etc., there are more than  
100,000 taxing units in the United  
States. Many persons live in  
jurisdictions, each with power  
to levy taxes on the same property  
or person.

## THE OUTLOOK FOR WAR

That able student of public af-  
fairs, Mr. Walter Lippmann, has  
been making an on-the-scene sur-  
vey of the European war situa-  
tion. He gives us the impression  
that the danger of a general Euro-  
pean war has passed, at least for  
the near future. He points out  
that France and Great Britain  
have prepared themselves in the  
last year or two for a stabili-  
zation of defense against aggression  
from Germany. And he makes another  
interesting point. He says that  
the lessons of the war in  
Spain and Italy have made  
military men revise their  
former belief that a surprise  
attack by airplane and tanks  
troops is bound to be successful  
against the best organized defense.  
Lippmann says that the  
knockout blow in a single season  
of campaigning her hope of win-  
ning is gone, says that the  
war is a long-drawn-out conflict  
the advantage is still with the defen-

# Helpful Facts About Old-Age Insurance

By Social Security Board Field  
Office, Indian, Alaska, and  
Hawaii.

In a long defensive war Ger-  
many even with Italy fighting  
at her side, would be at a disad-  
vantage. The resources of practically  
all of the world could be mobilized  
to meet the aggressors. So, Mr.  
Lippmann comes to the conclu-  
sion that the Hitler govern-  
ment will not precipitate a war unless  
and until it can, by peaceful means,  
gain control of the Danube Valley  
and so have free access to the  
resources of oil, minerals and food  
supplies of that region.

## A THEORY DISPROVED

Just 140 years ago, in 1788, a  
book was published which asserted  
that the "best-seller" of its  
time. Few books have had such  
a profound effect upon human  
thought as "An Essay on the Prin-  
ciple of Population" as it affects the  
thought of the world. By the Rev.  
Thomas Robert Malthus. It ran  
into several editions and has been  
reprinted in many languages.  
The argument of Malthus was  
that the population of the world  
will always be hindered by the  
misers' consumption on the land  
of the population. The theory was  
that the means of subsistence  
are limited.

## THE MALTHUSIAN THEORY DOMINATED

economic thinking and influ-  
enced the policy of nations for  
centuries. Wars were regarded as  
necessary to forestall universal  
starvation by reducing surplus  
population. What Malthus said  
did not foresee what science and  
invention would do to increase the  
productivity of agriculture that in-  
creased the population. The means  
of the population of the twen-  
tieth century would find a large  
sector of the population to be  
living with the problem of how to  
dispose of agricultural surpluses.  
The Malthusian theory was  
disproved by the fact that the  
people of America were tied di-  
rectly to the soil for their subsis-  
tence. The Malthusian theory  
is required, by the direct  
relationship of the population to  
the soil, to feed themselves and  
the 90 per cent of the popula-  
tion who are not engaged in agri-  
culture. To ask or expect your  
printers, then, to engage in a throat-  
cutting price war to a point where  
they would be unable to continue  
their work is to ask the impossible.  
And they are unable financially to  
contribute any civil service or

been making an on-the-scene sur-  
vey of the European war situa-  
tion. He gives us the impression  
that the danger of a general Euro-  
pean war has passed, at least for  
the near future. He points out  
that France and Great Britain  
have prepared themselves in the  
last year or two for a stabili-  
zation of defense against aggression  
from Germany. And he makes another  
interesting point. He says that  
the lessons of the war in  
Spain and Italy have made  
military men revise their  
former belief that a surprise  
attack by airplane and tanks  
troops is bound to be successful  
against the best organized defense.  
Lippmann says that the  
knockout blow in a single season  
of campaigning her hope of win-  
ning is gone, says that the  
war is a long-drawn-out conflict  
the advantage is still with the defen-

# Helpful Facts About Old-Age Insurance

By Social Security Board Field  
Office, Indian, Alaska, and  
Hawaii.

In a long defensive war Ger-  
many even with Italy fighting  
at her side, would be at a disad-  
vantage. The resources of practically  
all of the world could be mobilized  
to meet the aggressors. So, Mr.  
Lippmann comes to the conclu-  
sion that the Hitler govern-  
ment will not precipitate a war unless  
and until it can, by peaceful means,  
gain control of the Danube Valley  
and so have free access to the  
resources of oil, minerals and food  
supplies of that region.

## A THEORY DISPROVED

Just 140 years ago, in 1788, a  
book was published which asserted  
that the "best-seller" of its  
time. Few books have had such  
a profound effect upon human  
thought as "An Essay on the Prin-  
ciple of Population" as it affects the  
thought of the world. By the Rev.  
Thomas Robert Malthus. It ran  
into several editions and has been  
reprinted in many languages.  
The argument of Malthus was  
that the population of the world  
will always be hindered by the  
misers' consumption on the land  
of the population. The theory was  
that the means of subsistence  
are limited.

## THE MALTHUSIAN THEORY DOMINATED

economic thinking and influ-  
enced the policy of nations for  
centuries. Wars were regarded as  
necessary to forestall universal  
starvation by reducing surplus  
population. What Malthus said  
did not foresee what science and  
invention would do to increase the  
productivity of agriculture that in-  
creased the population. The means  
of the population of the twen-  
tieth century would find a large  
sector of the population to be  
living with the problem of how to  
dispose of agricultural surpluses.  
The Malthusian theory was  
disproved by the fact that the  
people of America were tied di-  
rectly to the soil for their subsis-  
tence. The Malthusian theory  
is required, by the direct  
relationship of the population to  
the soil, to feed themselves and  
the 90 per cent of the popula-  
tion who are not engaged in agri-  
culture. To ask or expect your  
printers, then, to engage in a throat-  
cutting price war to a point where  
they would be unable to continue  
their work is to ask the impossible.  
And they are unable financially to  
contribute any civil service or  
other worthy strikes us, show  
rather poor business judgment.  
The Herald is not a business  
for the purpose of putting any  
competitor out of business. We  
would feel much better to have  
a competitor had secured a  
piece of business at a decent price  
than to take it at a living price,  
merely for our competitor  
to be getting it at a living price.  
—Don't ask Herald.

## OUR MULTIPLYING TAXES

With governments expanding  
their functions into almost every  
phase of human activity, the prob-  
lem of taxation grows more com-  
plex and more important. The  
taxes and heavier taxes are be-  
coming more and more important.  
We have it on all authority  
that the Federal Government is  
one-third of the American people  
are lifted. They clearly do not  
pay for the protection of the  
country, school districts, fire dis-  
tricts, etc., there are more than  
100,000 taxing units in the United  
States. Many persons live in  
jurisdictions, each with power  
to levy taxes on the same property  
or person.

## NEW HOPE SINGING

The annual Home Coming Sav-  
ed Harp singing covered at  
New Hope Sunday, July 10th. The  
money is expended. We have not  
enough good schools, hospitals,  
highways, bridges, police and fire  
protection, and the list is long  
for which tax money is spent. It  
is a pity that such things should  
be paid for out of taxes. But there  
are many things about our  
national tax situation which call  
for revision.  
One is the duplication and over-  
lapping of functions in almost every  
phase of human activity. The prob-  
lem of taxation grows more com-  
plex and more important. The  
taxes and heavier taxes are be-  
coming more and more important.  
We have it on all authority  
that the Federal Government is
